

Logan Library Trends 2000 - 2019

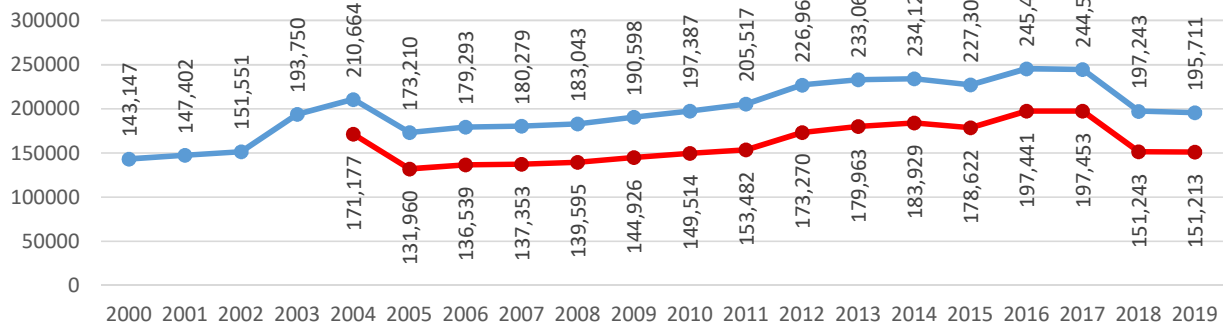

*Prior to 2011 we did not count eLibrary sessions or visits.

* In 2016, after migrating to SaaS in December 2015, we started counting visits to eLibrary instead of sessions. This was due to the way that SaaS reset and used sessions, a user could have multiple session per visit.

* In July 2019 eLibrary was migrated to Enterprise software and Google Analytics was implemented to count visits, changing what was counted.

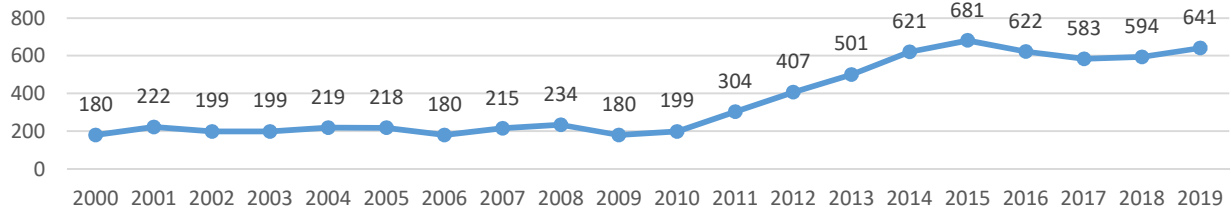

Collection 2000 - 2019

* In 2005 we removed the Marcive government document eResources from the collection.
 * In 2018 we removed the OverDrive and Rbdigital eResources from the collection.
